Subject: Update on RL-100 reprogramming request

The purpose of this e-mail is to provide a status on the reprogramming request for RL-100, Community and Regulatory Support and to request an update on when the data RL requested last June via e-mail on how assessed values are determined for Hanford Site lands will be provided.

RL's request to reprogram \$7 million from cleanup funding into RL-100, Community and Regulatory Support has been approved by DOE HQ and the Office of Management and Budget and is now being submitted to Congress to request their approval. At this time, we do not have an estimate on when we may hear back from the Congress on our request, but we will keep you posted as we hear more.

We would also like to check on the status of your providing the requested supporting information on how each county determines the assessed value of the various classification of Hanford lands that are used in support of your annual PILT requests. This information is needed so RL can validate the appropriateness of your PILT requests ***and is required before RL can make final payments on your calendar year 2016 PILT requests.*** This information is required whether or not our reprogramming is approved by Congress. Additionally, the timing and amount of final PILT payments will be determined when the Congress makes a determination on our RL-100 reprogramming request.

- Mr. Marks, thank you for the discussion on how Franklin County determines the assessed value, and we look forward to the additional information that you will be sending us per our conversation last week.
- Messrs. Fyall and Pheasant, please let me know if you would like to have a discussion to provide any clarification on our data request or to discuss any concerns that you may have on it.

If you have any questions, or would like to discuss, please call me or send me an e-mail.

Thank you,

Mark A. Coronado, Director
RL Budget Division
